PHYSIOLOGY AND BIOCHEMISTRY

Anatomical analysis of nodule development in soybean reveals an additional autoregulatory control point
by N. Gerahty, G. Caetano-Anollés, P.A. Joshi and P.M. Gresshoff (Knoxville, TN) 1–7

A glyphosate-resistant 5-*enol*-pyruvyl-shikimate-3-phosphate synthase confers tolerance to a maize cell line
by G. Forlani, E. Nielsen[a] and M.L. Racchi (Pavia and Milan, Italy) 9–15

Soluble ascorbate peroxidase from potato tubers
by M.R. Elia, G. Borraccino and S. Dipierro (Bari, Italy) 17–21

Developmental changes in lipoxygenase activity in cotyledons of cucumber seedlings
by K. Matsui, M. Irie, T. Kajiwara and A. Hatanaka (Yamaguchi, Japan) 23–32

Diversity of chitosanase activity in cucumber
by S. El Ouakfaoui and A. Asselin (Québec, Canada) 33–41

Role of silicon in salt tolerance of wheat (*Triticum aestivum* L.)
by R. Ahmad, S.H. Zaheer and S. Ismail (Karachi, Pakistan) 43–50

GENETICS AND MOLECULAR BIOLOGY

Differential accumulation of hydroxyproline-rich glycoprotein transcripts in sunflower plants infected with *Sclerotinia sclerotiorum* or treated with oxalic acid
by A. Mouly, D. Rumeau and M.-T. Esquerré-Tugayé (Toulouse, France) 51–59

Abiotic stresses induce a thaumatin-like protein in maize; cDNA isolation and sequence analysis
by P. Frendo, L. Didierjean, E. Passelegue and G. Burkard (Strasbourg, France) 61–69

Changes in protein synthesis without evidence of DNA methylation in barley chloroplasts during leaf growth and development
by R. Tomás, A. Vera, M. Martín and B. Sabater (Madrid, Spain) 71–77

Translational control of the synthesis of the *Euglena* light harvesting chlorophyll *a/b* binding protein of photosystem II
by R. Kishore and S.D. Schwartzbach (Lincoln, NE) 79–89

CELL AND TISSUE STUDIES IN VITRO

Callus formation from cultured protoplasts of banana (*Musa* sp.)
by R. Megia, R. Haïcour, L. Rossignol and D. Sihachakr (Orsay, France) 91–98

Kinetics of cellular growth and diosgenin biosynthesis in *Dioscorea caucasica* cell suspensions, cultured in batch system
by C. Deliu, M. Tamas, C. Dobrota and C. Munteanu-Deliu (Cluj, Romania) 99–105

The detection of lipid peroxidation products in cryoprotected and frozen rice cells: consequences for post-thaw survival
by E.E. Benson, P.T. Lynch and J. Jones (Nottingham, UK) 107–114

GENERAL

Isolation of structurally intact secretory cavities from leaves of African marigold, *Tagetes erecta* L. (Asteraceae)
by W.A. Russin, T.F. Uchytil and R.D. Durbin (Madison, WI) 115–119

Book Reviews 121–124

PHYSIOLOGY AND BIOCHEMISTRY

Activities of sucrose metabolising enzymes during sucrose accumulation in developing acid limes
E. Echeverría (Lake Alfred, FL) 125–129

Biological activity of a synthetic pentasaccharide fragment of xyloglucan
Z.N. Pavlova, O.A. Ash, V.A. Vnuchkova, A.V. Babakov, V.I. Torgov, O.A. Nechaev, A.I. Usov and V.N. Shibaev (Moscow, USSR) 131–134
Evidence of increased ^{15}N-ammonium assimilation in tomato plants with exogenous α-ketoglutarate
J.R. Magalhães, D.M. Huber and C.Y. Tsai (Brasilia, Brazil; West Lafayette, IN) 135–141
Kinetic comparison between soluble and polyacrylamide-entrapped depsidone ether hydrolase from the lichen *Pseudevernia furfuracea*
C. Vicente, M. Carmen Cambón and E. García-Junceda (Madrid, Spain) 143–149

GENETICS AND MOLECULAR BIOLOGY
Maize S1 and S2 sequences in wheat mitochondrial DNA
H. Rathburn and C. Hedgcoth (Manhattan, KS) 151–160

CELL AND TISSUE STUDIES IN VITRO
Formation of aescin glucosides by callus tissue from cotyledonary explants of *Aesculus hippocastanum* L.
P. Profumo, A.M. Caviglia and P. Gastaldo (Genoa, Italy) 161–164
Myrosinase is localized to the interior of myrosin grains and is not associated to the surrounding tonoplast membrane
A.-S. Höglund, M. Lenman and L. Rask (Uppsala, Sweden) 165–170
A reliable strategy for the study of disease and hypersensitive reactions induced by *Erwinia amylovora*
M.-N. Brisset and J.-P. Paulin (Beaucouze, France) 171–177
Use of feeder cells to improve barley protoplast culture and regeneration
H. Funatsuki, H. Lörz and P.A. Lazzeri (Hamburg, Germany) 179–187
Ploidy level stability of callus tissue, axillary and adventitious shoots of *Larix* × *eurolepis* Henry regenerated in vitro
J. Wyman, N. Brassard, D. Flipo and S. Laliberté 189–196
Production of fertile hybrids by electrofusion of vacuolated and evacuolated tobacco mesophyll protoplasts
B. Naton, M. Ecke and R. Hampp (Tübingen, FRG) 197–208
Highly frequent appearance of tetraploidy in regenerated plants, a universal phenomenon, in tissue cultures of melon (*Cucumis melo* L.)
H. Ezura, H. Amagai, K. Yoshioka and K. Oosawa (Ibaraki, Hokkaido and Ibaraki, Japan) 209–213
Shoot formation from somatic hybrid callus between soybean and a perennial wild relative
N. Hammatt, A. Lister, B. Jones, E.C. Cocking and M.R. Davey (Nottingham, UK) 215–222
Glyphosate tolerance in *Cichorium intybus* L. var. Magdebourg
C. Sellin, G. Forlani, J. Dubois, E. Nielsen and J. Vasseur (Villeneuve d'Ascq, France; Pavia, Italy) 223–231

Announcements 233–234
